

Extraordinary experiences!

E-Bike Tours

Do you like challenges, fresh air and proximity to nature? Are you curious about the Gotland that is off the beaten track? Do you think it's fun to get around in rough terrain? Join us for a half day or more of cycling!

Our Yamaha Moro 07 eMTB e-bikes are built to handle everything from regular roads to more challenging terrain. Light, agile, tough bikes, they are perfect for Gotland's winding forest roads and paths. Perhaps you'll be lucky enough to see a "rabbis", golden eagle or even the "Byse"?

MCraft will handle all the practicalities of accommodation, food and route selection. Berra also tells you about the places you visit, as well as anecdotes from his motorbike trips around the world.

This is a fun challenge for you and your friends or workmates. The difficulty level is adapted to the group, but you should be in good shape because you have to keep up!

Berra picks you up with his car every day and equips you with bikes, helmets, camelbacks, and tools. Then you drive to different parts of Gotland depending on the weather and wind and your interests. Examples

Price: I only charge for the bike tours, including transfer, lunch and equipment. Price 1500 SEK/ half day. I offer a half day for free if you ride for at least three days!

of areas for cycling include the Cliff Coast (Klintkusten), Fårö, Sudret, or Visby and the surrounding area.

There will be many wonderful nature scenes and fun cycling. Everyone can keep up regardless of fitness level, electric bikes help those who need more power, and those who are already strong take less help from the electric motor, which works perfectly!

You book the hotels yourself, but if you contact me, I can suggest some that I co-operate with to get a better price. It is advisable to choose a hotel in Visby. Then you can eat and pay for your dinners wherever you want in cosy Visby.

Join us!
